<b>Office Action Summary</b>	<b>Application No.</b> 10/526,273	<b>Applicant(s)</b> HOLL ET AL.	
	<b>Examiner</b> Carl S. Miller	<b>Art Unit</b> 3747	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3747

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8, 9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hlousek (WO('966).

In particular, Hlousek teaches a valve having ports on the periphery from the low pressure pump and to a drain as well to the high-pressure pump. As the outlet to the high-pressure pump closes this outlet is vented to the low pressure outlet (see Figure 1).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hlousek in view of Krimmer.

Hlousek applies as noted above and Krimmer teaches a throttle valve between high and low pressure pumps that uses a longitudinal groove on the exterior of the valve element to throttle the flow to the high pressure pump and to control the vent to the low pressure drain.

It would have been obvious to modify Hlousek by using the hollow valve element and bore of Krimmer to control the flow because Krimmer was being used in the same type of high pressure fuel system as that of Hlousek.

Claims 17 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hlousek and Krimmer as applied to claim 8 above, and further in view of Kellner.

Kellner teaches the details of the applicant's pump inlet and chamber and because such high pressure pumps are common in the art, it would have been obvious to use this type of pump in Hlousek.

Claims 15, 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hlousek in view of Kellner.

Hlousek and Kellner apply as noted in the rejection of Claim 17 above. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
